

Pulse Secure on Android

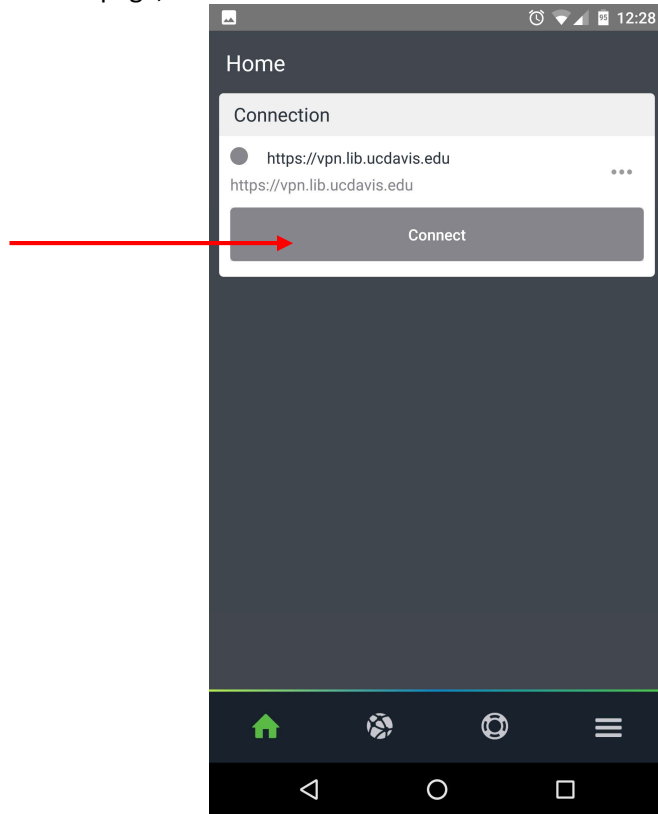

1. Search and install “Pulse Secure” on the Play Store app.
2. Launch the application. When prompted for the corporate email address, enter “vpn.lib.ucdavis.edu”.

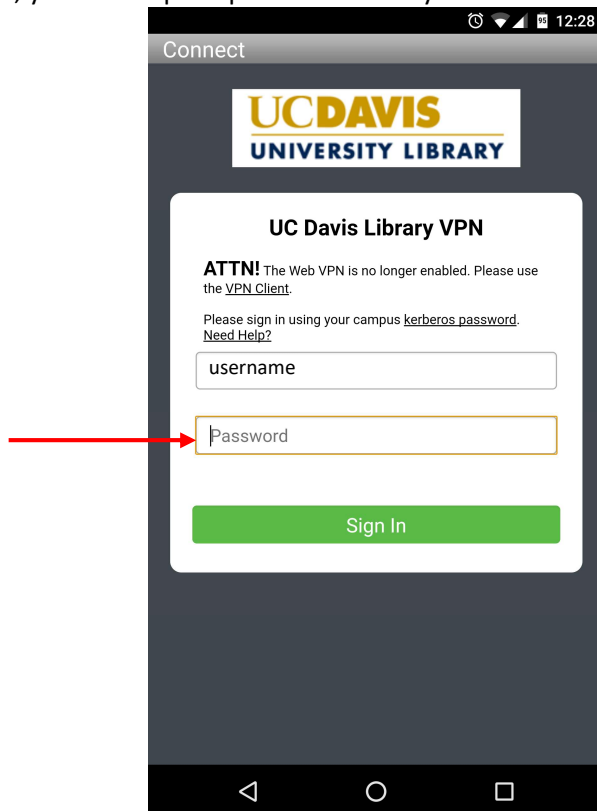

3. To continue setup on the “Add a Connection” page, enter your Kerberos username and leave the other fields blank. Press Add.

4. On the “Home” page, click Connect.

5. If not enabled, you will be prompted to enter in your Kerberos login information.

6. Accept the Connection Request to finish the connection.
