02 Log In and Create a Reading List

Templates are an easy way to sort and organize classroom readings for your students. For your convenience, the library provides two templates.

Blank template
This template has no predefined sections.

Use this template to create your own custom-sorted reading list. Sections may be whatever you like: books vs. articles, weeks of the term, topic, etc.

Basic template
This template has two predefined sections: Required and Recommended Reading.

To move Recommended Reading to be the topmost section of the list, you may do so by simply dragging and dropping.
